|--|------|
| Foreword   | xiii |
| Preface  | xv   |
| Introduction   | xvii |
| 1. Normal Anatomy of the Alimentary Canal                | 1    |
| General Composition of Alimentary Canal Organs           | 1    |
| Pharynx  | 2    |
| Esophagus  | 4    |
| Stomach  | 8    |
| Small Bowel  | 12   |
| Large Bowel  | 16   |
| Bibliography   | 21   |
| 2. Gastrointestinal Physiology                           | 23   |
| Motility of the Alimentary Canal                         | 23   |
| The Act of Swallowing                                    | 25   |
| Motility of the Stomach                                  | 28   |
| Motility of the Small Bowel                              | 30   |
| Motility of the Large Bowel                              | 32   |
| Bibliography   | 33   |
| 3. Radiologic Aspects of Gastrointestinal Pathology      | 34   |
| Normal and Pathologic Characteristics                    | 34   |
| Congenital Anomalies                                     | 37   |
| Acquired Pathologic Conditions                           | 39   |
| Bibliography   | 59   |
| 4. Radiologic Examination of the Alimentary Canal        | 61   |
| Principles   | 61   |
| Plain Roentgenography of the Abdomen                     | 63   |
| Fluoroscopy  | 72   |
| Roentgenography of the Chest                             | 72   |
| Radiologic Management Preceding a Barium Meal            | 74   |
| Radiographic Contrast Media for Alimentary Canal Studies | 74   |

|   |            |
|---|------------|
| Pharmacoradiography                                   | 78         |
| Single-Contrast Examinations                          | 80         |
| Examination of Children under Four Years of Age       | 97         |
| Double-Contrast Examinations                          | 98         |
| Multiphasic Gastrointestinal Examinations             | 114        |
| Ultrasound Examination                                | 114        |
| Computed Tomography                                   | 117        |
| Magnetic Resonance Imaging                            | 127        |
| Arteriography   | 131        |
| Lymphangiography                                      | 133        |
| Scintigraphy  | 133        |
| Interventional Radiology                              | 134        |
| Errors in the Process of Radiologic Diagnosis         | 136        |
| Radiologic Reports                                    | 137        |
| Evaluation of Radiologic Diagnostic Methods           | 137        |
| Bibliography  | 138        |
| <br>  |            |
| <b>5. The Acute Abdomen</b>                           | <b>145</b> |
| Radiography   | 145        |
| Obstruction   | 147        |
| Perforation of an Alimentary Canal Organ              | 157        |
| Bibliography  | 160        |
| <br>  |            |
| <b>6. Radiology of the Pharynx</b>                    | <b>162</b> |
| Functional Disorders                                  | 162        |
| Pharyngeal Webs                                       | 166        |
| Relations Between the Hypopharynx and Adjacent Organs | 167        |
| Pharyngeal Diverticula                                | 167        |
| Retropharyngeal Abscess                               | 169        |
| Neoplasms   | 171        |
| Foreign Bodies of the Pharynx                         | 172        |
| Bibliography  | 173        |
| <br>  |            |
| <b>7. Radiology of the Esophagus</b>                  | <b>175</b> |
| Functional Disorders                                  | 175        |
| Abnormal Position of the Esophagus                    | 184        |
| Congenital Malformations                              | 188        |
| Esophageal Diverticula                                | 194        |
| Esophageal Varices                                    | 201        |
| Esophagitis   | 202        |
| Hiatus Hernia   | 206        |
| Gastroesophageal Reflux                               | 209        |
| Reflux Esophagitis                                    | 213        |
| Barrett's Esophagus                                   | 216        |
| Peptic Ulcers   | 218        |
| Zollinger-Ellison Syndrome                            | 219        |
| The Ring of Schatzki                                  | 219        |
| Scleroderma—Progressive Systemic Sclerosis            | 223        |

|   |         |
|---|---------|
| <b>Granulomatous Diseases</b>               | 223     |
| <b>Neoplasms</b>                            | 223     |
| <b>Foreign Bodies in the Esophagus</b>      | 232     |
| <b>Injuries</b>                             | 233     |
| <b>Corrosive Lesions</b>                    | 234     |
| <b>The Postoperative Esophagus</b>          | 235     |
| <b>Bibliography</b>                         | 239     |
| <br><b>8. Radiology of the Stomach</b>      | <br>243 |
| Disorders of Tone and Motility              | 243     |
| Acquired Changes of Gastric Position        | 246     |
| Congenital Anomalies                        | 254     |
| Pyloric Hypertrophy in Children             | 256     |
| Pyloric Hypertrophy in Adults               | 260     |
| Gastric Varices                             | 261     |
| Giant Gastric Folds                         | 261     |
| Prolapse of Gastric Mucosa                  | 264     |
| Gastritis                                   | 265     |
| Benign Infiltrative Diseases                | 274     |
| Peptic Ulcer                                | 274     |
| Benign Neoplasms                            | 281     |
| Malignant Neoplasms                         | 288     |
| Foreign Bodies in the Stomach               | 301     |
| Corrosive Gastritis                         | 301     |
| The Postoperative Stomach                   | 304     |
| Bibliography                                | 314     |
| <br><b>9. Radiology of the Duodenum</b>     | <br>318 |
| Functional Disorders                        | 318     |
| Congenital Malformations                    | 321     |
| Diverticula                                 | 323     |
| Extrinsic Masses                            | 324     |
| Duodenal Obstruction                        | 326     |
| Varices                                     | 328     |
| Duodenitis                                  | 330     |
| Granulomatous Infiltration of the Duodenum  | 332     |
| Enlarged Brunner's Glands                   | 332     |
| Peptic Ulcers                               | 332     |
| Duodenal Hematoma                           | 340     |
| Progressive Systemic Sclerosis              | 342     |
| Neoplasms                                   | 342     |
| Duodenal Perforation                        | 347     |
| Duodenal Fistulas                           | 347     |
| Foreign Bodies                              | 349     |
| The Postoperative Duodenum                  | 349     |
| Bibliography                                | 350     |

| Injuries   | 396 |
| The Small Bowel in Children                                    | 396 |
| Bibliography   | 398 |
| <br>11. Diseases That Affect Both Small and Large Bowel        | 400 |
| Intestinal Ischemia  | 400 |
| Infections and Infestations                                    | 407 |
| Ulcerative Colitis and Crohn's Disease                         | 408 |
| Miscellaneous Chronic Inflammatory Diseases                    | 432 |
| Polyposis Syndromes  | 434 |
| Fistulas   | 439 |
| Metastases of the Alimentary Canal and Peritoneum              | 439 |
| Bowel Surgery and Postoperative Appearance                     | 447 |
| Diaphragmatic Hernia   | 449 |
| The Effects of Drugs on the Alimentary Canal                   | 449 |
| Bibliography   | 450 |
| <br>12. Radiology of the Colon, Ileocecal Area, and the Rectum | 453 |
| Functional Sphincters of the Colon                             | 453 |
| Irregularity of the Normal Colon Contour                       | 453 |
| Functional Disorders   | 459 |
| Abnormal Anatomical Location of the Colon                      | 459 |
| Megacolon  | 467 |
| Diverticula  | 471 |
| Obstructions   | 481 |
| Lymphoid Follicles of the Colon                                | 483 |
| Granulomatous Diseases of the Large Bowel                      | 484 |
| Pneumatosis Coli   | 484 |
| Amyloidosis  | 485 |
| Scleroderma  | 485 |
| Radiation Proctocolitis  | 485 |
| Graft-versus-Host Reaction                                     | 486 |
| Neoplasms of the Large Bowel                                   | 486 |
| Pathology of the Appendices Epiploicae                         | 508 |
| The Postoperative Large Intestine                              | 508 |

|  |     |
|--|-----|
| Radiology of the Ileocecal Area                      | 510 |
| Chronic Granulomatous Diseases of the Ileocecal Area | 517 |
| Diverticula of the Appendix                          | 517 |
| Appendicitis   | 517 |
| Mucocele of the Appendix                             | 520 |
| Intussusception of the Appendix                      | 520 |
| Neoplasms  | 520 |
| Obstructions of the Ileocecal Area                   | 521 |
